

19 November 2020 Statewide Data Set

Nevada's COVID-19 hospitalizations remained flat over the past 24-hours. The northern part of the state experienced their first significant decline in weeks. The southern area of the state experienced increases, but not of the magnitude seen in previous days.

It is still too early to determine with any degree of certainty but, these are encouraging signs that the public is taking "Stay at Home 2.0" seriously.

NOTE: Charts and graphs will not be produced on either Thanksgiving or Family day next week.
