

28 December 2020 Statewide Data Set

The number of COVID-19 related hospitalizations appears to be plateauing in a range of 1,900- 2,000 (confirmed and suspected) over the past 14-day period.

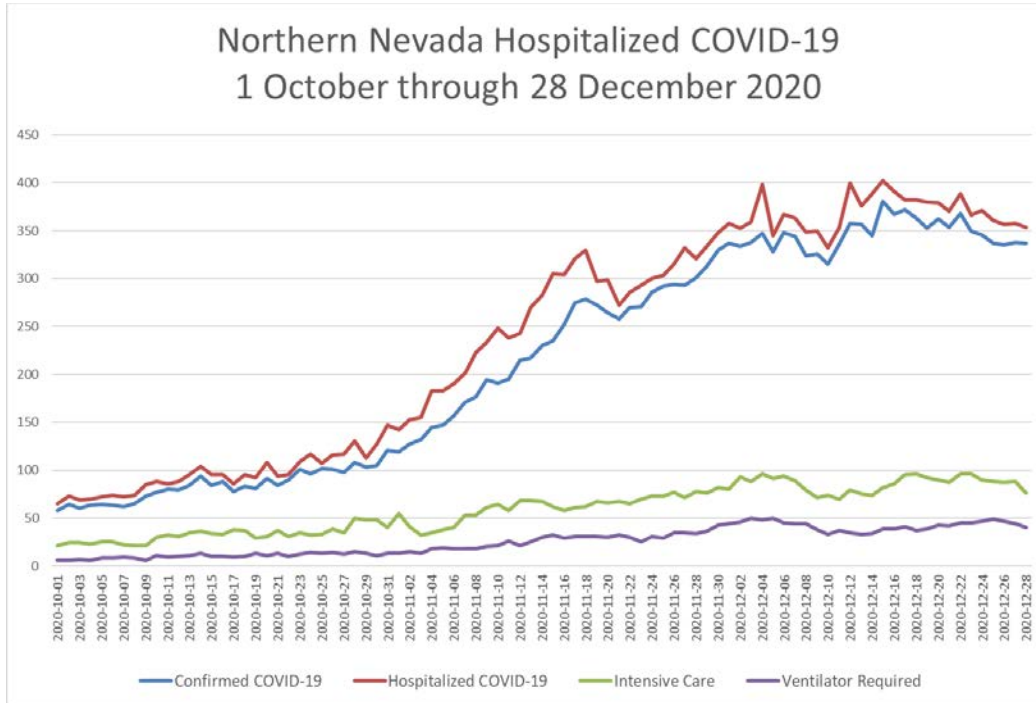

Hospitals remain near 74-80% capacity in both ward and intensive care occupancy. PPE and ventilator status remain good. Staffing remains a challenge in the urban centers throughout the state.

Review of the pediatric age demographic shows that Nevada has

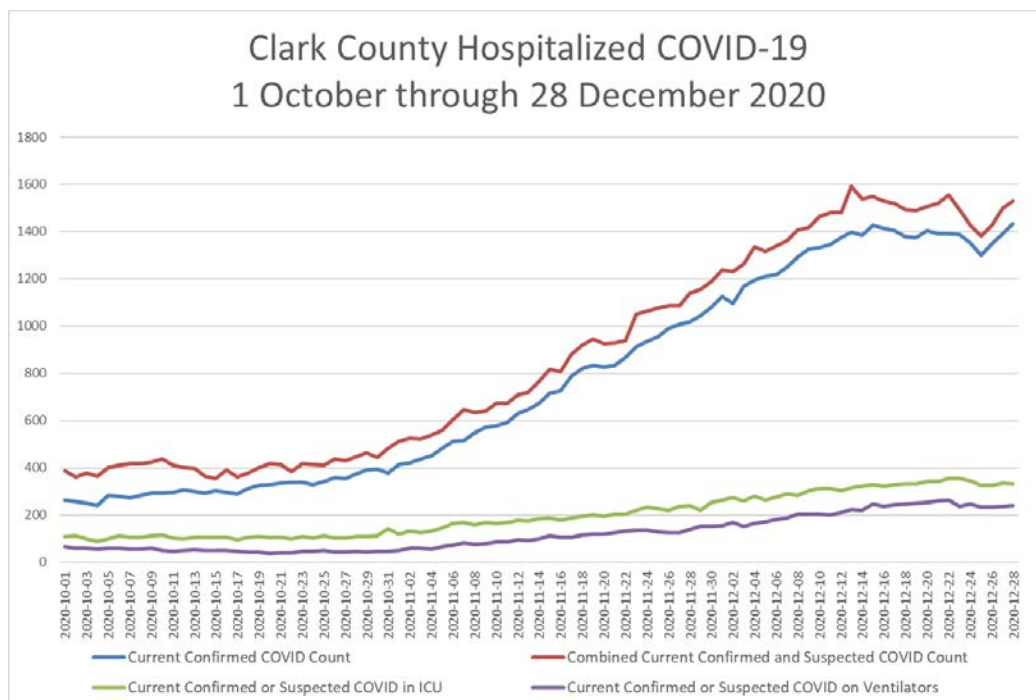

not experienced significant numbers of school-aged children hospitalized as a result of COVID-19.

COVID-19 has been accounting for approximately 17-20% of daily emergency department visits over the past 60 days.
