

## 12 January 2021 Statewide Data Set

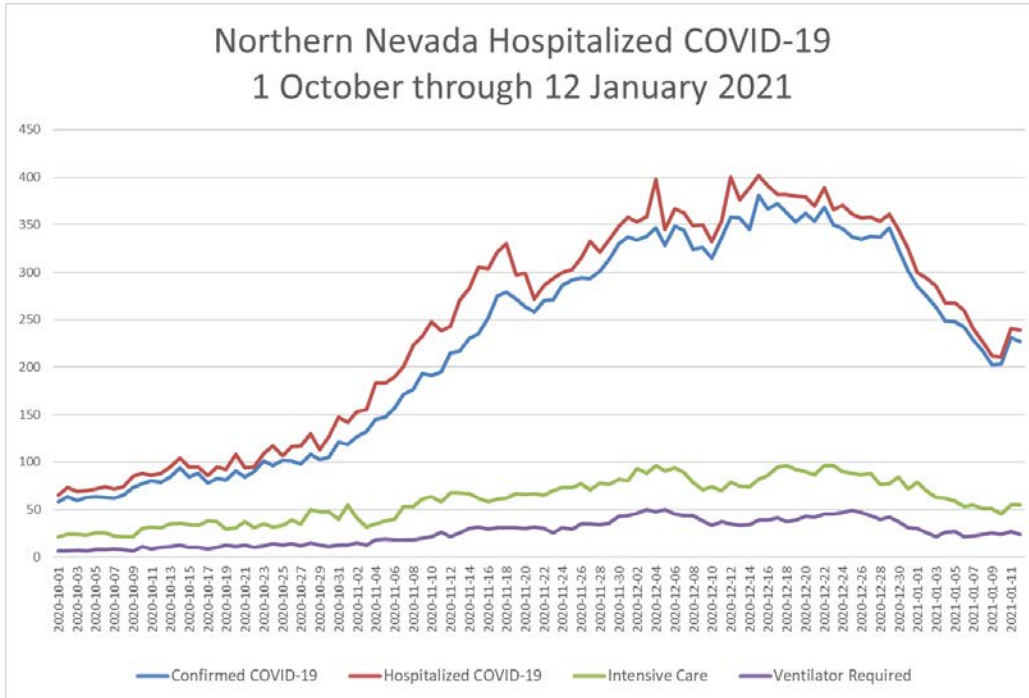

Nevada hospitalizations remain plateaued at near peak levels with appreciable declines only in the northern part of the state. Currently, 1,690 people are in the hospital with confirmed COVID-19 and an additional 94 individuals are suspected of having COVID-19.

Hospital occupancy rates are in the 82-85% range with ICU occupancy at 74% statewide (82% in the southern region).

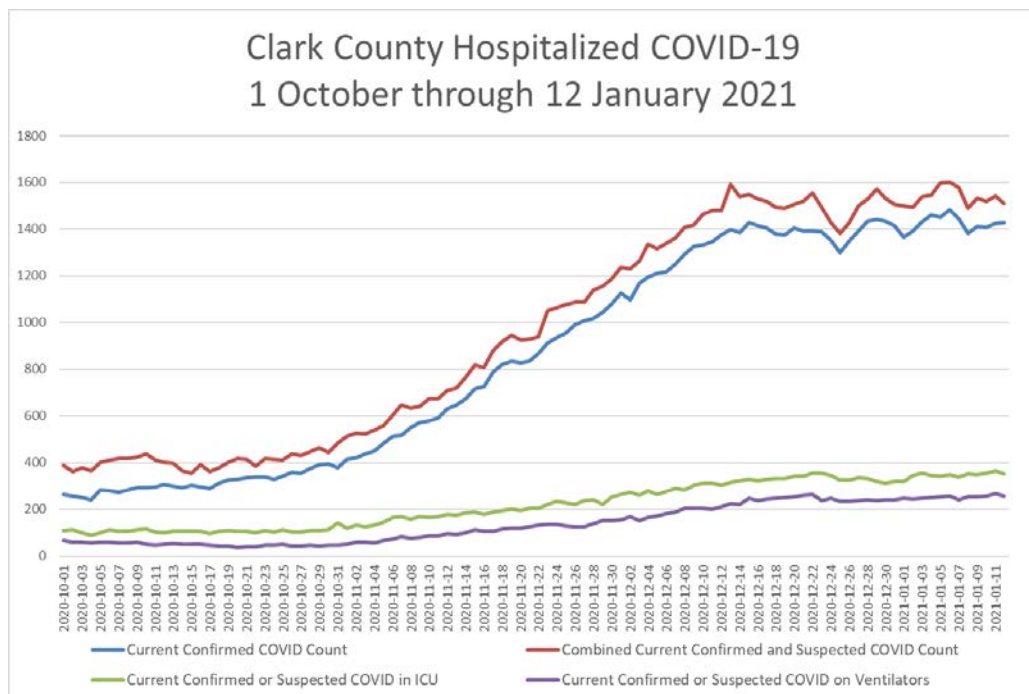

The southern region has multiple hospitals with elevated occupancy rates both within the wards and ICUs.

Hospitals are reporting good conditions related to PPE, supplies and equipment. Staffing remains a challenge at several hospitals. Additionally, there were rumors of oxygen shortages, similar to what LA reported in the news. These rumors did not validate when fact-checked with area hospitals. The NHA will continue to monitor the oxygen situation as we do with all supplies and equipment.
