

6 January 2021 Statewide Data Set

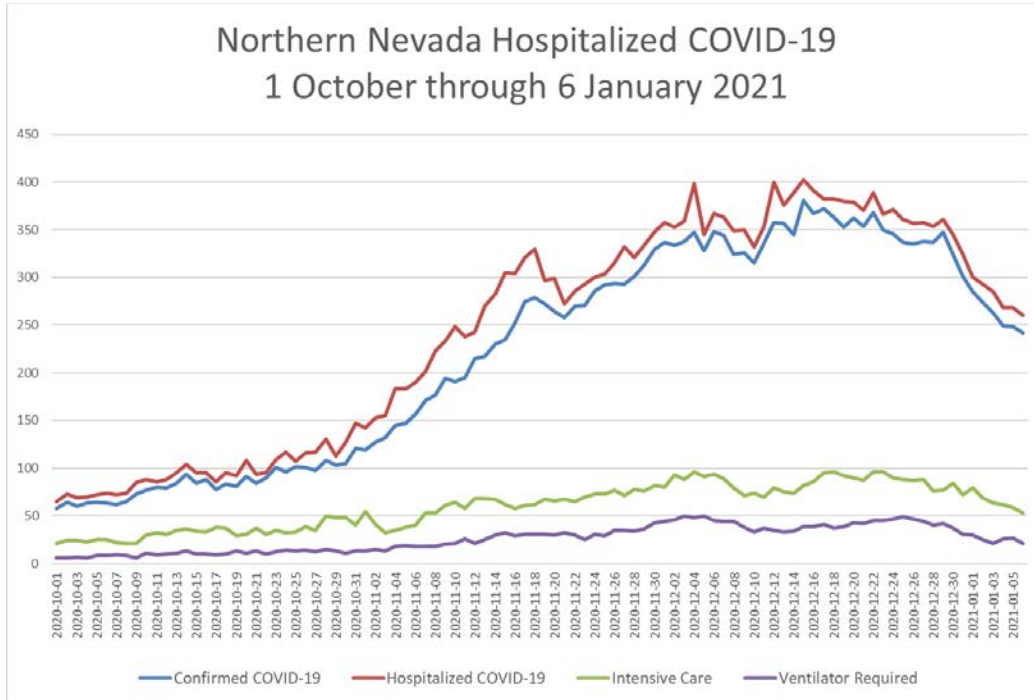

Nevada's COVID-19 hospitalizations continue to level off at the peak of the curve. This has been providing the hospital infrastructure a much-needed reprieve and has kept hospitals and ICUs from being overwhelmed throughout the state. Influenza also has not placed heavy demands on hospitals to date.

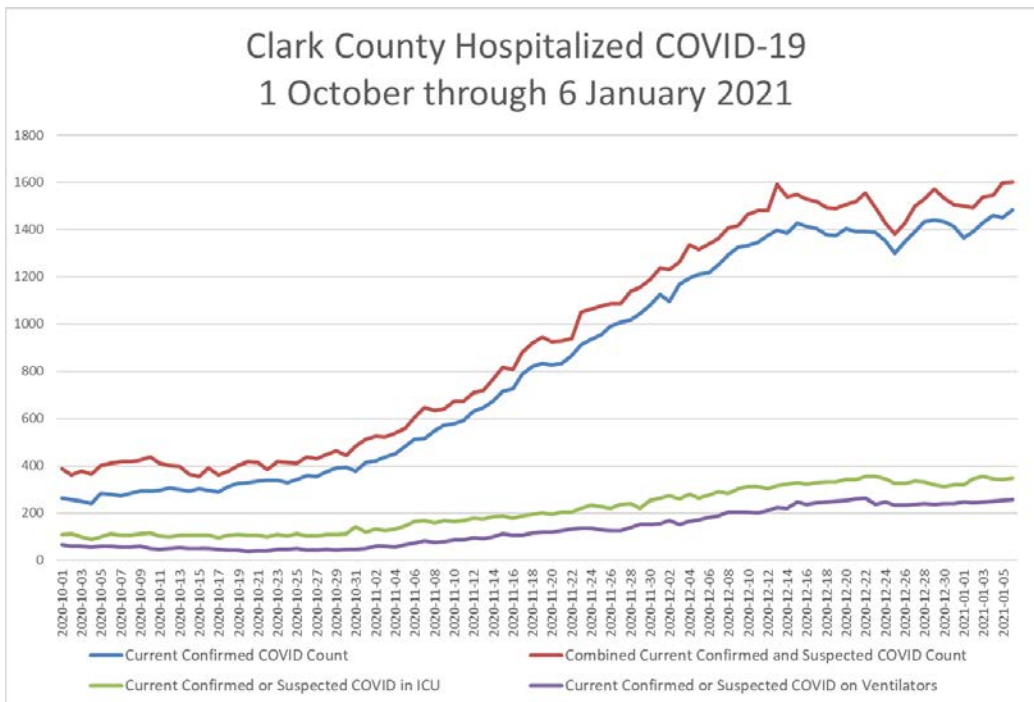

The average daily emergency department demand being placed on hospitals by COVID has remained steady as well; approximately 18-21% of all ED visits over the past month have been for COVID related chief complaints.

The northern area of the state continues to see significant declines in required hospitalizations, intensive care use, and necessary mechanical ventilator requirements.
