

17 November 2020 Statewide Data Set

Nevada continues to see exponential growth in COVID-19 hospitalizations driven almost exclusively by Washoe and Clark Counties which currently account for 97% of all hospitalizations. Current strategies are not successfully minimizing the spread of serious disease.

Meanwhile, hospitals are adapting to the influx of patients and continue to have capacity, therapeutics, and ventilators. Some individual facilities are experiencing significant occupancy rates, however, the overall burden being placed on facilities

currently is 23% statewide.

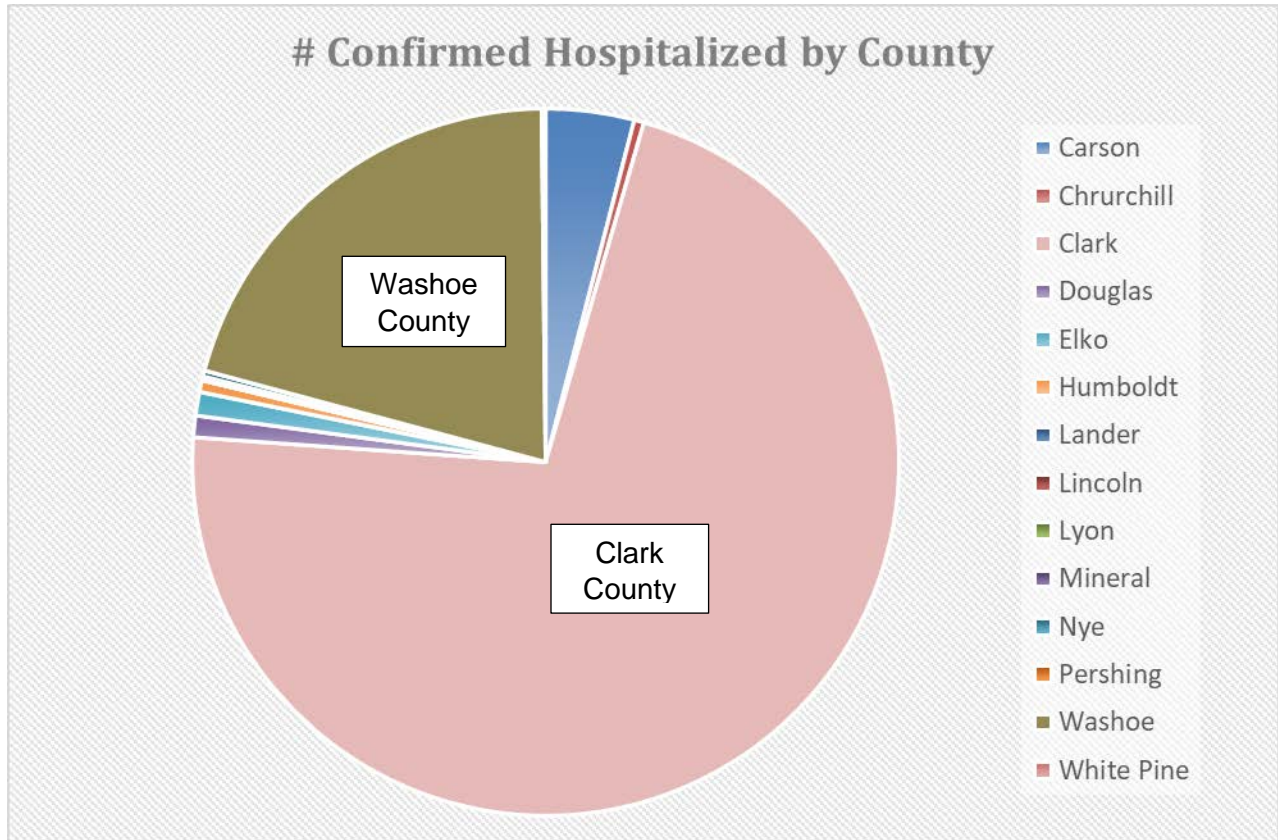

Total hospitalized cases are at 1,246 and confirmed cases hospitalized is at 1,105. These are the highest numbers experienced within Nevada to date.
