

14 September 2020 Statewide Data Set

Nevada's COVID-19 hospitalizations remained essentially flat. A slight increase in suspected COVID-19 hospitalized patients is appreciated along with a slight decrease in confirmed cases.

For added prospective, the hospitalized case counts recorded 3 months ago (15 June) were 349 total cases with 214 confirmed cases. Case counts on 15 Sept. are 473 total cases with 389 confirmed cases. This represents an increase of 299 seriously ill

persons for the past 3 months (chart 2).

Reminder, the Labor Day holiday weekend was Sept. 5-7. If we are going to see an increase of severe illness caused by parties or other events with poor social distancing etiquette, 12-22 Sept. would be the window of correlation.

COVID-19 Daily Statistics
