

Weekly Wrap Up - 2022 Week 8

COVID-19 hospitalizations continue to decline throughout Nevada. Patients hospitalized with flu are virtually non-existent throughout the state. Hospital operations are beginning to return to normalcy. Discharges to lower or more appropriate levels of care remain difficult.

Week 8

	PPE	Supplies	Vents	Staffing	% of Patients in the hospital with COVID	% of Patients in the ICUs with COVID	Hosp. Occupancy Rates (All-Hazard)	ICU Occupancy Rates (All-Hazard)
NORTH	Green	Yellow	Green	Red	Yellow	Yellow	Yellow	Yellow
SOUTH	Green	Yellow	Green	Red	Yellow	Yellow	Yellow	Yellow
RURAL	Green	Yellow	Green	Red	Yellow	Yellow	Yellow	Yellow

What Does This Mean ?

The table visually communicates the relative level of concern being experienced within the hospital infrastructure. This table aggregates individual hospital reporting, discussions with hospital leaders and effect of mitigation measures being employed.

No Concern

Watch

Warning

Alert

Crisis

No Concern, hospitals are functioning in a conventional manner. **Watch**, we are studying the various metrics and mitigation controls to manage hospital operations. **Warning**, hospitals are employing mitigation methods and using various contingencies to manage upward trends. **Alert**, immediate additional mitigation methods are required to keep the hospital system operational. **Crisis**, hospitals are experiencing conditions that limit the ability to provide adequate patient care.

Risk Table Highlights: COVID-19 hospitalizations continue to decline and are anticipated to return to the baseline appreciated before the Delta wave. Hospitals report a return to normalcy with visiting hours being reestablished and medically necessary procedures and surgeries being routinely performed. Flu is not placing any demand on our hospital infrastructure at this time. Hospitals are not reporting any concerns related to equipment or supplies. Staffing remains a significant concern throughout the healthcare continuum, contributing to hospitals' continued difficulty transferring patients out to lower, more appropriate levels of care.

The NHA continues to work with our vendor to restore the county-level data within the portal. We appreciate your patience as we work to make the required programming changes.
